The following listing of claims will replace all prior versions and listings of claims in this application.

## Listing of Claims:

Claims 1-3 (canceled).

Claim / (currently amended): A compound 8 to 50 nucleobases in length targeted to nucleobases 3314 through 3333 of a coding region of a nucleic acid molecule encoding MEKK4 of SEO ID NO: 3, wherein said compound specifically hybridizes with said region and inhibits the expression of MEKK4, The compound of claim 2 and wherein the compound is an antisense oligonucleotide which comprises at least one modified internucleoside linkage.

Claim 8 (original): The compound of claim 8 wherein the modified internucleoside linkage is a phosphorothicate linkage.

Claim % (currently amended): The compound of claim 2 claim A wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Claim / (original): The compound of claim / wherein the modified sugar moiety is a 2'-o-methoxyethyl sugar moiety.

Attorney Docket No.: RTS-0169 Inventors: Serial No.:

Claim 8' (currently amended): The compound of claim 2 claim A wherein the antisense oligonucleotide comprises at least one modified nucleobase.

Claim & (original): The compound of claim & wherein the modified nucleobase is a 5-methyloytosine.

Claim 10 (currently amended): The compound of claim 2 claim 4 the antisense oligonucleotide is a chimeric wherein oligonucleotide.

Claims 11-12 (canceled).

Claim 13 (currently amended): A The composition comprising the compound of claim 12 claim 4 and further comprising a colloidal dispersion system.

Claim 14 (canceled).

Claim 18 (currently amended): A method of inhibiting the expression of MEKK4 in cells or tissues comprising contacting said cells or tissues in vitro with the compound of claim  $\pm \cancel{x}$  so that expression of MEKK4 is inhibited.

Claims 16-20 (canceled).
